

The European Multiclient Survey

Highlights

Fourth wave - December 2024

RESEARCH METHODOLOGY

Research Methodology

This survey has been conducted online through CAWI method (Computer Assisted Web Interview) on a sample representative of the European Union 18+ population.

The total sample size is 5.112 complete interviews, distributed proportionally to the population of the 27 EU countries with a slight correction which allows to analyze the data on the pan-European level and 5 different areas: Germany, France, Eastern Europe, Northern Europe, Southern Europe. For each country proportional quotas were set for age and gender. Quotas were calculated regarding the most recent parameters provided by Eurostat.

Interviews were collected between the 28th of November and the 7th of December 2024, in the local language.

The report shows breakdowns by European political groups parties' voters and the following geographical areas:

1) Germany

2) France

3) Central and Eastern Europe (Baltic states, Poland, Czech R., Slovakia, Hungary, Romania, Bulgaria, Croatia, Slovenia)

4) Northern Europe (Sweden, Denmark, Finland, Belgium, Netherlands, Lux., Ireland, Austria)

5) Southern Europe (Spain, Italy, Portugal, Greece, Malta, Cyprus)

+ separate data for Italy and Spain

For European political groups parties' voters, in each country, people were interviewed on EU election vote on a national party basis and the results were recoded into European political groups.
